

At A G Glencoe

Up to 1988, the December issue contains a cumulative list of decisions reported for the year, by act, docket numbers arranged in consecutive order, and cumulative subject-index, by act.

Guidebook to the best graded winter climbing routes around Ben Nevis and Glen Coe, with nearly 1000 buttresses, ridges and gullies described, all illustrated with photo topos. This guide covers all that is best on Ben Nevis, as well as Carn Dearg, Aonachs Mor and Beag, and Bidean nam Bian and its related summits, Buchaille Etive Mor, Beinn Udlaidh and outlying peaks in Glen Coe as are the crags on Stob Coire an Laoigh and Mullach nan Coirean. With colour photography throughout and information on interpreting avalanche forecasts, as well as a section on judging which crags will be in good condition, will make this guide essential for all winter climbers.

Dramatic changes caused by a foreign-owned nickel mining company in an Indonesian town provide the setting for this ethnographic study. Robinson notes the changes that took place in Soroako, a village in Sulawesi. The book outlines the effects of this new development, principally in regard to the 1,000 indigenous Soroakans whose former agricultural land is now the site for the mining town. It

presents an analysis of developing capitalist relations in the mining town, investigating changes not only in the sphere of production manifested in daily life as new forms of work, but also in culture and ideology. The book also investigates related changes in other areas of social life, in particular that of women's roles, marriage and the family, and the importance of ideologies of race and ethnicity in regulating relations between different groups in the mining town. Furthermore, Robinson shows that new ideological forms have arisen in the context of the evolving class structure.

This is based on our 592-page Adventure Guide to Scotland, but it zeroes in on the Highlands and the island of Skye. Also includes an extensive introductory section on Scotland as a whole. Comprehensive background information - history, culture, geography and climate - gives you a solid knowledge of each destination and its people. Regional chapters take you on an introductory tour, with stops at museums, historic sites and local attractions. Places to stay and eat; transportation to, from and around your destination; practical concerns; tourism contacts - it's all here! Detailed regional and town maps feature walking and driving tours. Then come the adventures - fishing, canoeing, hiking, rafting and more. Includes extensive lists of recommended outfitters, with all contact details - e-mail, website, phone number and location. The definitive guide to

every aspect of the Highlands and Skye - the legends, the clans, the castles and romantic hotels, the Highland games and, of course, the whiskey. This long-time Scotland resident takes us to every site you will want to see.

Jens Jensen was one of America's greatest landscape designers and conservationists. Using native plants and "fitting" designs, he advocated that our gardens, parks, roads, playgrounds, and cities should be harmonious with nature and its ecological processes--a belief that was to become a major theme of modern American landscape design. When Jensen died in 1951 at the age of 90, the New York Times called him "the dean of American landscape architecture." In *Jens Jensen: Maker of Natural Parks and Gardens*, Robert E. Grese evaluates Jensen's work against the background of landscape design traditions that included Andrew Jackson Downing and Frederick Law Olmsted, as well as earlier movements in Europe. Grese examines Jensen's part in the Chicago cultural renaissance that occurred just prior to World War I, a movement that brought social reform, a new understanding of ecology, organic trends in architecture, and great strides in American literature. Drawing on Jensen's writings and plans, interviews with people who knew him, and analyses of his projects, Grese presents a clear picture of Jensen's efforts to enhance and preserve "native" landscapes. Jens Jensen worked with some of the leading architects of his

day--Sullivan and Wright among them--so many of his projects involved the extravagant estates of wealthy entrepreneurs in Illinois, Michigan, Wisconsin, and elsewhere. But Jensen also worked on schools, parks, playgrounds, hospitals, institutional homes, and government buildings. Long before environmental activists took over the idea, he foresaw the need to preserve the dunes, forests, prairies, and wetlands native to the Middle West. He championed the network of forest preserves around Chicago, protection of the Indiana Dunes (now a national lakeshore), the state park system in Illinois, and numerous parks in Wisconsin. Jens Jensen: Maker of Natural Parks and Gardens offers a compelling look at Jensen's visionary work and remarkable career.

This handbook provides basic facts regarding foodborne pathogenic microorganisms and natural toxins.
