Over the years, startling evidence has been unearthed, challenging established notions of the origins of Earth and life on it, and suggesting the existence of a superior race of beings who once inhabited our world. The product of thirty years of intensive research, *The 12th Planet* is the first book in Zecharia Sitchin's prophetic Earth Chronicles series--a revolutionary body of work that offers indisputable documentary proof of humanity's extraterrestrial forefathers. Travelers from the stars, they arrived eons ago, and planted the genetic seed that would ultimately blossom into a remarkable species...called Man. *The 12th Planet* brings to life the Sumerian civilization, presenting millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and of the landings of the Anunnaki on Earth every 3,600 years, and reveals a complete history of the solar system as told by these early visitors from another planet. Zecharia Sitchin's Earth Chronicles series, with millions of copies sold worldwide, deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. The series is offered here, for the first time, in highly readable, hardbound collector's editions with enhanced maps and diagrams.

From the foreword: "One of the High Line's powers is its ability to evoke time, to remind us of the changes we've experienced during our own lives, to bring forth echoes of the past, and to make us guess what life might be like

years from now. I love the photos on these pages, because they have that power, too." --Joshua David, Co-Founder of the Friends of the High Line. Ten Avenues Press, in association with Friends of the High Line, announce the publication of High Line Nudes. In 2006, photographer Kevin McDermott took three of his friends up on the abandoned railroad tracks that would become New York City's High Line park to shoot a series of nudes. As McDermott states in his introduction, "at the time I took these photos, what I sought from its beauty was its sense of isolation, being alone, surrounded by nature in the middle of this metropolis." A decade later, this location is now one of the most visited tourist destinations in NYC and one of the largest real estate developments in the world. High Line Nudes captures a seemingly impossible, but beautiful moment in the history of the West Side Rail Yards, Chelsea and an ever changing New York City. The cloth hardcover book is beautifully printed in color and rich black and white duotone images.

The momentous encounter between Christian thought and Greek philosophy reached a high point in fourth-century Byzantium, and the principal actors were four Greek-speaking Christian thinkers whose collective influence on the Eastern Church was comparable to that of Augustine on Western Latin Christendom. In this erudite and informative book, a distinguished scholar provides the first coherent account of the lives and writings of these so-called Cappadocians (named for a region in what is now eastern Turkey), showing how they managed to be Greek and Christian at the same time.

Jaroslav Pelikan describes the four

Cappadocians--Gregory of Nazianzus, Basil of Caesarea, Gregory of Nyssa, and Macrina, sister and teacher of the last two--who were trained in Classical culture, philosophy, and rhetoric but who were also defenders and expositors of Christian orthodoxy. On one issue of faith and life after another--the nature of religious language, the ways of knowing, the existence of God, the universe as cosmos, time, and space, free will and immortality, the nature of the good life, the purpose of the universe--they challenged and debated the validity of the Greek philosophical tradition in interpreting Scripture. Because the way they resolved these issues became the very definition of normative Christian belief, says Pelikan, their system is still a key to our understanding not only of Christianity's diverse religious

traditions but also of its intellectual and philosophical traditions. This book is based on the prestigious Gifford Lectures, presented by Jaroslav Pelikan at the University of Aberdeen in 1992 and 1993.

Conventional wisdom suggests that the Platonist philosophers of Late Antiquity, from Plotinus (third century) to the sixth-century schools in Athens and Alexandria, neglected the political dimension of their Platonic heritage in their concentration on an otherworldly life. Dominic O'Meara presents a revelatory reappraisal of these thinkers, arguing that their otherworldliness involved rather than excluded political ideas, and he proposes for the first time a reconstruction of their political philosophy, their conception of the function, structure, and contents of political science, and its relation to political virtue and to the divinization of soul and state. Among the topics discussed by O'Meara are: philosopher-kings and queens; political goals and levels of reform: law, constitutions, justice, and penology; the political function of religion; and the limits of political science and action. He also explores various reactions to these political ideas in the works of Christian and Islamic

Filling a major gap in our understanding, *Platonopolis* will be of substantial interest to scholars and students of ancient philosophy, classicists, and historians of political thought. This polemic is essential reading for anyone concerned with the state and direction of architecture and urban planning today.

It is a remarkable fact that the writings of Philo, the Jew from Alexandria, were preserved because they were taken up in the Christian tradition. But the story of how this process of reception and appropriation took place has never been systematically researched. In this book the author first examines how Philo's works are related to the New Testament and the earliest Christian writing, and then how they were used by Greek and Latin church fathers up to 400 c.e., with special attention to the

contributions of Clement, Origen, Didymus, Eusebius, Gregory of Nyssa, Ambrose, and Augustine. Philo in Early Christian Literature is a valuable guide to the state of scholarly research on a subject that has thus far been investigated in a rather piecemeal fashion.

In order for children to have access to quality

educational experiences, all members of the school community must participate in school restructuring (parents, advocates, educators, community leaders, and policymakers). Researchers and teacher training institutions also play a vital role. This book provides easy access to information of particular interest to different groups and individuals who support advocacy-driven school reform. It is organized around 10 vital student entitlements discussed within 8 chapters that focus on the following topics: parent participation, student admission and placement, student instruction, enhancing individual potential, student support services, school climate, teacher empowerment, and school finance. A fictional vignette is presented at the beginning of each chapter, representing an imaginary elementary school on its way to becoming the Good Common School (a school with the primary goal of providing educational excellence for all of its students). Following these vignettes are step-by-step instructions or standards for achieving advocacy-driven reform. The second section of each chapter supports the need for fundamental change by documenting the problems found within most public elementary schools. Following the vignettes and problem statements, advocacy strategies in each chapter show how advocates work to reform schools in their own communities. These are followed by descriptions of promising school-based practices

successfully implemented in real elementary schools. Each chapter ends with a summary of education research relating to the chapter's topics. (561 references) (LAP)

Reviews the history of Christian thought about ethics, and discusses its views concerning politics, economics, and culture

This fresh analysis of the "state of the question" in Christian ethics charts the course for future study and exploration in the field. Written in honor of James Gustafson, who provides a conclusion, these 22 original and tightly argued essays examine hotly debated controversies on a wide range of topics, from sources of theological ethics to the moral life. At the core of these complementary perspectives is the ever-increasing tension between the particularity of religious and philosophical traditions and the universality of moral discourse. Designed for classroom use.

The overall objective is to establish the context of Plutarch's work in the society and the historical circumstances for which it was written.

Information and Communication Technologies (ICTs) have profoundly changed many aspects of life, including the nature of entertainment, work, communication, education, healthcare, industrial production and business, social relations and conflicts. They have had a radical and widespread impact on our moral lives and hence on contemporary ethical debates. The Cambridge Handbook of Information and Computer Ethics, first published in 2010,

provides an ambitious and authoritative introduction to the field, with discussions of a range of topics including privacy, ownership, freedom of speech, responsibility, technological determinism, the digital divide, cyber warfare, and online pornography. It offers an accessible and thoughtful survey of the transformations brought about by ICTs and their implications for the future of human life and society, for the evaluation of behaviour, and for the evolution of moral values and rights. It will be a valuable book for all who are interested in the ethical aspects of the information society in which we live.

In the midst of Trump's attacks on the media, comes this look at the rigorous, independent reporting of the year's most underreported news stories. While the country's president displays a brazen disregard for the First Amendment and routinely demonizes the press as "the enemy of the people," *Censored 2020* looks beyond Donald Trump's dizzying contempt for the truth to clarify the corporate media's complicity in misinforming the American public--while also providing a clear vision of a better future, based on rigorous, trustworthy independent reporting that presents a fuller picture of truth. With a discerning eye, *Censored 2020* focuses the public's attention on the most important but underreported news stories of 2018-2019. These stories expose the corporate news media's systemic blind spots while highlighting the crucial role played by independent journalists in providing the kind of news necessary for informed, engaged citizens. The book also examines this year's lowlights in "junk food news" and "news abuse"--further revealing how corporate news often functions as

propaganda--as well as highlights of exemplary organizations that champion "Media Democracy in Action." Additional chapters address the importance of constructive journalism, the untold story of Kashmir, news coverage of LGBTQ issues in the Trump era, "fake news" as a Trojan horse for censorship, and online memes as a form of political communication.

An attractive two-color format gives an accessibility to charts, tables, algorithms and the overall design. Beyond the signs and symptom-based focus, several unique features distinguish this book among its competitors including a review of modern family theory in the age of managed care, presentation of family medicine as a process, and distinct sections for the new subspecialty areas of sports medicine and geriatrics.

Pieter Coecke van Aelst (1502 – 1550) was renowned throughout Renaissance Europe as a draftsman, painter, and publisher of architectural treatises. The magnificent tapestries he designed were acquired by the wealthiest clients of the day, up to and including rulers such as Emperor Charles V, King Francis I of France, King Henry VIII of England, and Grand Duke Cosimo I de' Medici of Tuscany. At the same time, Coecke was remarkable not only for the complexity and unparalleled quality of his tapestries, but also for his fluency in various media: this lavishly illustrated volume examines the full range of his work, from tapestry and stained-glass window designs to panel paintings, prints, drawings, and architectural treatises. Though only forty-eight when he died, Coecke was one of the greatest Netherlandish artists of the sixteenth century. His paintings and drawings, initially wrought in the style of the Antwerp Mannerists, evolved through his enthusiastic response to Italian Renaissance design, and influenced generations of artists in his wake. This comprehensive study explores Coecke's stylistic

development, as well as his substantial contribution to the body of great Renaissance art in Flanders. Featuring twenty monumental tapestries, along with many of their cartoons and preparatory sketches, plus seven paintings, additional drawings, and printed matter—many of them newly photographed for this volume—Grand Design provides a thorough reappraisal of Coecke's work, amply justifying the high regard in which Coecke's work was held and its wide dissemination long after his death.

scientists treat federalism as a set of abstract principles or a maze of budgetary transfers with little connection to real political life. This concise and engaging book boils the discussion down to its essence: federalism is about power, specifically the tug for power among and within the various levels of government. Author Larry N. Gerston examines the historical and philosophical underpinnings of federalism; the various "change events" that have been involved in defining America's unique set of federal principles over time; and the vertical, horizontal, and international dimensions of federalism in the United States today. The result is a book examining the ways in which institutional political power is both diffused and concentrated in the United States.
