The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Pictures of Angela Merkel in a Nazi uniform, the burning of German flags, newspaper articles portraying Southern Europe as work-shy and Northern Europe as tight-fisted: The Eurozone crisis has thrown up old stereotypes; often digging into well-established historical images of 'the other'. The conscious or tacit (ab)use of national prejudices by politicians and parts of the media, and the strong emotional reactions among European citizens have caused a lot of public concern about the likely negative implications of such reawakening of national clichés and the newly hardening boundaries they construct for the process of European integration. It is evident that current and recent crises confront European citizens with profound dilemmas which they seek to make sense of, and in response to which much new political mobilisation takes place. At the same time, some of the interpretative and political reactions thus generated also have the potential to become very destructive processes, putting into question years of integration efforts. This book brings together scholars who examine the nexus between (economic) crisis, national identities and the use of historical images, and prejudices and stereotypes, by focusing particularly on media and political discourses in different European countries. In addition to detailed empirical discussions covering diverse national settings across Europe, the different contributions discuss and offer a variety of conceptual and methodological approaches within the inter-disciplinary study of national identities, prejudice and stereotyping in the context of socio-economic and political crises. This book was originally published as a Special Issue of *National Identities*.

In this first book-length study of Charles Johnson's work, Jonathan Little offers an engaging account of the artistic growth of one of the most important contemporary African American writers. From his beginnings as a political cartoonist through his receipt of the National Book Award for *Middle Passage*, Johnson's imagination has become increasingly spiritual. Little draws upon a wide array of sources, including short stories, interviews, reviews, articles, and cartoons, as he traces the brilliant achievement of this provocative artist who is very much at the height of his career. Charles Johnson's *Spiritual Imagination* begins with an analysis of Johnson's political cartoons from the late sixties and early seventies, when he was immersed in the Black Power Movement. Little shows that in these early cartoons one can already see Johnson's comic genius and his quest for unconstrained artistic freedom even when dealing with the highly charged issues of racial politics. By examining how Johnson incorporates the influences of phenomenology, Zen Buddhism,

Taoism, Hinduism, and Romanticism into a strikingly original perspective on individual and social identity, Little chronicles Johnson's development. The book illuminates the progression of Johnson's aesthetics as he deals with the at times disturbing contrast between the hope offered by art and spirituality and the harsh realities of African American existence. As he situates Johnson within the tradition of African American literature, Little pairs each of his novels with a major precursor, including novels by Richard Wright and Ralph Ellison, and such far-ranging sources as Hermann Hesse's *Siddhartha* and the *Ten Oxherding Pictures*. These comparisons help to show Johnson's innovations within the African American literary tradition and include discussions of naturalism, realism, and modernism. This book will appeal to anyone interested in African American literature, spirituality, aesthetics, and the culture wars.

"The essays collected here chart the war and its cultural and literary contours from a variety of new and challenging intellectual vantage points." "Focusing in different essays on America, France, Britain, and Germany, the contributors to this book contest the long-accepted argument about World War I as the crucible of modern life. Instead, their interrogations of the trench experience, home-front conditions, forms of mass culture, and literary genres reveal that the war was as much a moment of cultural opportunity as it was the point of origin for modern society or its cultural forms."--BOOK JACKET. For military cartoonists the absurdity of war inspires a laugh-or-cry response and provides an endless source of un-funny amusement.

Cartoons by hundreds of artists-at-arms from more than a dozen countries and spanning two centuries are included in this study--the first to consider such a broad range of military comics. War and military life are examined through the inside jokes of the men and women who served. The author analyzes themes of culture, hierarchy, enemies and allies, geography, sexuality, combat, and civilian relations and describes how comics function within a community. A number of artists included were known for their work with Disney, Marvel Comics, the *New Yorker* and *Madison Avenue* but many lesser known artists are recognized.

The self-descriptive title, A Universal Template For Research Position and Life Experience Papers, implies that there is a position that writers take in even the simplest of essays. As such, Template provides an opportunity to accomplish two tasks at once: consider the definitive differences between Research, Position, and Experience papers, and explore the issues that impound and empower contemporary urban education. Dale Benjamin Drakeford provides an interactive workshop to guide student writing on any social science subject. Agreeing with many scholars that public and free pedagogy is indispensable, the author also argues that there is no wrong or right in scholastic debate, only correct presentation of objective thoughts or non-objective attitudes. This the author says, is what is sometimes forgotten in the heat of getting ideas on paper. Hence, Template provides structure for planning papers, and in-process cues for staying on task to complete them with proper formality.

In a world increasingly dominated by visual sensation, our understanding of the role and influence of comics and cartoon humour in popular culture has become essential. This book offers a critical and cognitive focus that captures the changing fortunes of Catalan humour production against the shifting political landscape in the period 1898–1982. It considers how Catalan satire has been influenced by periods of relative calm as well as censorship, violence, war and dictatorship, and among its key features is its presentation of a continued cartooning tradition that was not ended by the installation of the Franco dictatorship, but which rather continued in a number of adapted forms, playing its own role in the evolution of the period. Thus, as well as introducing the most representative cartoonists and publications, the Catalan example is used to explore broader aspects of this complex communication form, opening new avenues for cultural, historical and socio-political research.

This book offers a new interpretation of the place of periodicals in nineteenth-century Ireland. Case studies of representative titles as well as maps and visual material (lithographs, wood engravings, title-pages) illustrate a thriving industry, encouraged, rather than defeated by the political and social upheaval of the century. Titles examined include: The Irish Magazine, and Monthly Asylum for Neglected Biography and The Irish Farmers' Journal, and Weekly Intelligencer; The Dublin University Magazine; Royal Irish Academy Transactions and Proceedings and The Dublin Penny Journal; The Irish Builder (1859-1979); domestic titles from the publishing firm of James Duffy; Pat and To-Day's Woman. The Appendix consists of excerpts from a series entitled 'The Rise and Progress of Printing and Publishing in Ireland' that appeared in The Irish Builder from July of 1877 to June of 1878. "A fascinating collection" of wartime cartoons from the beloved children's author and illustrator (The New York Times Book Review). For decades, readers throughout the world have enjoyed the marvelous stories and illustrations of Theodor Seuss Geisel, better known as Dr. Seuss. But few know the work Geisel did as a political cartoonist during World War II, for the New York daily newspaper PM. In these extraordinarily trenchant cartoons, Geisel presents "a provocative history of wartime politics" (Entertainment Weekly). Dr. Seuss Goes to War features handsome, large-format reproductions of more than two hundred of Geisel's cartoons, alongside "insightful" commentary by the historian Richard H. Minear that places them in the context of the national climate they reflect (Booklist). Pulitzer Prize-winner Art Spiegelman's introduction places Seuss firmly in the pantheon of the leading political cartoonists of our time. "A shocker—this cat is not in the hat!" —Studs Terkel

Metapragmatics of Humor: Current research trends contributes to a new area in the pragmatics of humor: its conception as a metapragmatic ability. The book collects thirteen chapters organized into three parts: Revisions and applications of General Theory of Verbal Humor (GTVH) in a metapragmatic context; Metapragmatic awareness of humor across textual modes; and Metapragmatic practices within the acquisition of humor. Thus, this book provides an up-to-date panorama of this field, where metapragmatic abilities are described in adults as well as in children, on humorous and non-humorous genres — jokes, cartoons, humorous monologues, parodies, conversation, Twitter —, and using several approaches, such as GTVH, multimodality, conversational analysis, eye-tracking methodology, etc.

This book approaches law as a process embedded in transnational personal, religious, communicative and economic relationships that mediate between international, national and local practices, norms and values. It uses the concept "living law" to describe the multiplicity of norms manifest in transnational moral, social or economic practices that transgress the territorial and legal boundaries of the nation-state. Focusing on transnational legal encounters located in family life, diasporic religious institutions and media events in countries like Norway, Sweden, Britain and Scotland, it demonstrates the multiple challenges that accelerated mobility and increased cultural and normative diversity is posing for Northern European law. For in this part of the world, as elsewhere, national law is challenged by a mixture of expanding human rights obligations and unprecedented cultural and normative pluralism enhanced by expanding global communication and market relations. As a consequence, transnationalization of law appears to create homogeneity, fragmentation and ambiguity, expanding space for some actors while silencing others. Through the lens of a variety of important contemporary subjects, the authors thus engage with the nature of power and how it is accommodated, ignored or resisted by various actors when transnational practices encounter national and local law. First published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

During WW II, the closest most Americans ever came to combat was through the cartoons of Bill Mauldin, the most beloved enlisted man in the U.S. Army. This book brings together Mauldin's complete works from 1940 through the end of the war under one cover. This collection of over 600 cartoons, most never before reprinted, is more than the record of a great artist: it is an essential chronicle of America's citizen-soldiers from peace through war to victory.

Representations of Islam in United States Comics, 1880-1922 examines the depiction of Islam, Muslims, and the Islamic world in U.S. popular culture, particularly comics and related artifacts, between 1880 and 1922. Through cartoons, comics, editorial cartoons, serialized advertisements and other materials the book unfolds a narrative about how the Islamic world and its people were understood by the American government and its people. This "knowledge," garnered from popular culture of the day, produced a lens through which domestic and international relationships were created and maintained. Representing a wide swath of U.S. popular culture and discourse, the reflections these artifacts offer are united in their depiction of the "Oriental" in an era that is largely assumed to have been marked by American un-interest

in the region, peoples and religion. An exciting contribution to a growing field, this book resituates the U.S. within the Islamic world, using the everyday medium of comics to provide a fresh perspective on the subject.
