The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

This book is a collection of important contributions by Japanese researchers and their coauthors to present current advances in behavioral economics and finance, particularly in relation to decision making and human well-being. The topics covered in this volume include decision making under the conditions of inter-temporal choices, risk and social relations, happiness and the neuro-scientific/biological basis of behavior. The book includes works of research, both theoretical and empirical, on time discounting, time preferences, risk aversion, altruism, social status, happiness, addiction, limited attention and health and financial investments. The authors of the chapters add supplementary discussions to survey more recent advances on related topics or to provide detailed information that were abbreviated in the original publications. The addenda will enable readers to deepen their understanding of decision making and human well-being.

This revised edition features simulations, role plays, smallgroup discussions and other activelearning instructional activities to help students explore economic concepts through reallife applications.

This essential guide for curriculum developers, administrators, teachers, and education and economics professors, the standards were developed to provide a framework and benchmarks for the teaching of economics to our nation's children.

This book studies the evolution of the middle class in Russia after the fall of the Soviet Union. Using data from the RLMS (Russian Longitudinal Monitoring Survey), the volume covers the period of transition (1991-2008) during which many fundamental economic reforms were implemented. The first part of the book is devoted to a discussion of the concept of middle class and a description of the economic situation in Russia during the transition period. Particular attention is given to variations in the distribution of Russian incomes and the estimated importance of the middle class. The second part of the book focuses on the link between the middle class and income bipolarization. The third and last section of the book uses the semiparametric "mixture model" to discover how many different groups may be derived from the income distribution in Russia, as well as what the main socio-economic and demographic characteristics of those groups are. The mobility of households into and out of the middle class during the transition period is also studied in hopes of determining the factors that contribute to such mobility. Using rigorous empirical methods, this volume sheds light on a relatively unstudied economic group and provides insight for countries which are about to enter a transition period. As such, this book will be of great interest to researchers in economics and inequality as well as professionals and practitioners working with international organizations.
