The E-Books is authored by proficient Teachers and professors. The Text of the E-Books is simple and lucid. The contents of the book have been organised carefully and to the point Strictly according to the latest syllabus prescribed by Bihar School Examination Board (BSEB) Patna, Jharkhand Academic Council (JAC), Ranchi and other State Boards following CBSE curriculum based on NCERT guidelines.

Primarily intended as a text for undergraduate students of engineering for their core course in environmental studies, this book gives a clear introduction to the fundamental principles of ecology and environmental science and aptly summarizes the relationship between ecology and environmental engineering. Divided into three parts, the book begins by discussing the biosphere, natural resources, ecosystems, biodiversity, and community health. Then it goes on to give detailed description on topics such as pollution and control, environmental management, and sustainable development. Finally, it focuses on environmental chemistry, environmental microbiology, and monitoring and analysis of pollutants.

Designed for a first-course in environmental engineering for undergraduate engineering and postgraduate science students, the book deals with environmental pollution and its control methodologies. It explains the basic environmental technology - environmental sanitation, water supply, waste management, air pollution control and other related issues - and presents a logical and systematic treatment of topics. The book, an outgrowth of author's long experience in teaching the postgraduate science and engineering students, is presented in a student-oriented approach. It is interspersed with solved examples and illustrations to reinforce many of the concepts discussed and apprise the readers of the current practices in areas of water processing, water distribution, collection and treatment of domestic sewage and industrial waste water, and control of air pollution. It emphasizes fundamental concepts and basic applications of environmental technology for management of environmental problems. Besides students, the book will be useful to the academia of environmental sciences, civil/environmental engineering as well as to environmentalists and administrators working in the field of pollution control.

Meant for all the undergraduate students of Indian Universities, this book meets the syllabus requirements of UGC. Maintaining a holistic approach throughout, the book offers easy and logical comprehension. Excellent clarity in concepts renders the subject easy for all the students irrespective of their background at school level. Key features Comprehensive coverage of Pollution, Components of Environment and Biodiversity (core to the syllabus). Important topics like Genetic Engineering in relation to Biodiversity and Catalytic Converters and Electrostatic Precipitators dealt with in detail. (Refer chapter 5 & 6) The International Conventions and Protocols for Environmental Protection discussed in detail. (Not a feature in competition) Quality Diagrams: Enables clear understanding of the concepts. (For example: Refer diagrams on Sulphur Cycle and Rain Water Harvesting) Currentness: Latest statistical data included. (For example: Refer Page Number 158, The Top Ten of Worst Polluted Places- As per 2007 ratings) Pedagogical Features : Review questions - 203 Objective-type questions- 146 Cases from the Indian scenario -- will help in the field work and report- 35 Short Answer Questions. 136 Glossary of technical terms frequently used in Environmental Science New to the edition: Addition of 6 new Case Studies. Inclusion of topics like, Ecological Succession, In situ and Ex situ Conservation, etC. Moved chapter on Science of Environment from text to the OLC Clarity in concepts. Quality diagrams. Currentness in the data given. Presence of strong pedagogical features

Therefore, soil contamination constitutes a critical issue to be addressed if we are to secure the life quality of present and future generations.

Integrated efforts from researchers and policy makers are required to develop sound risk assessment procedures, remediation strategies and sustainable soil management policies. Environmental Risk Assessment of Soil Contamination provides a wide depiction of current research in soil contamination and risk assessment, encompassing reviews and case studies on soil pollution by heavy metals and organic pollutants. The book introduces several innovative approaches for soil remediation and risk assessment, including advances in phytoremediation and implementation of metabolomics in soil sciences.

The book has been designed topic and subtopic-wise, keeping the students’ needs in mind. The current edition has certain unique features: Each chapter starts with a To Do list. It gives the central idea of the chapter and the way it has been addressed. Each chapter is divided into several sections corresponding to different components of the syllabus. Each chapter is

splashed with HOTS. This is to promote clarity of the basics. Focus Zones in each chapter present a crux of the concepts. Blocks in each chapter include matter of special significance. Power Points and Revision Window offer a quick glance of the subject matter. 'Exercise' is tuned to the pattern of examination. Answers to important questions focus on the technique of writing. The exercise includes: objective type questions (remembering & understanding based questions), divided into five sections: (a) multiple choice questions, (b) fill in the blanks, (c) true or false, (d) matching the correct statements, (e) 'very short answer' objective type questions reason-based questions HOTS & applications analysis & evaluation CBSE questions (with answers or reference to the text for answers) NCERT questions (with hints to answers) miscellaneous and add-on questions (with hints or reference to the text for answers) Dos and Don'ts (at the end of each chapter) should serve as a safeguard against misinterpretation of the concepts. Ability Zone is a uniquely designed section at the end of the chapter. This raises the difficulty level, of course, but should serve as a useful material for the outstanding learners. Solved & Unsolved numericals are given to boost a grip on the subject.

This book contains more than 1400 multiple choice questions covering various environment-related topics, such as ecology and environment, biodiversity, natural resources, eco-marketing, environmental finance, air pollution, and water pollution. The first chapter is a comprehensive introduction to environmental studies. The book will prove beneficial for academicians, students pursuing courses on environmental studies, professionals, aspirants of various competitive exams, and stakeholders in the environment sector. It can also be handy for various quiz programmes.

This book is meant for diploma students of chemical engineering and petroleum engineering both for their academic programmes as well as for competitive examination. This book Contains 18 chapters covering the entire syllabus of diploma course in chemical engineering and petrochemical engineering. This book in its present form has been designed to serve as an encyclopedia of chemical engineering so as to be ready reckoner apart from being useful for all types of written tests and interviews faced by chemical engineering and petrochemical engineering diploma students of the country. Since branch related subjects of petrochemical engineering are same as that of chemical engineering diploma students, so this book will be equally useful for diploma in petrochemical engineering students.

Environmental and Pollution Science, Third Edition, continues its tradition on providing readers with the scientific basis to understand, manage, mitigate, and prevent pollution across the environment, be it air, land, or water. Pollution originates from a wide variety of sources, both natural and man-made, and occurs in a wide variety of forms including, biological, chemical, particulate or even energy, making a multivariate approach to assessment and mitigation essential for success. This third edition has been updated and revised to include topics that are critical to addressing pollution issues, from human-health impacts to environmental justice to developing sustainable solutions.

Environmental and Pollution Science, Third Edition is designed to give readers the tools to be able to understand and implement multi-disciplinary approaches to help solve current and future environmental pollution problems. Emphasizes conceptual understanding of environmental systems and can be used by students and professionals from a diversity of backgrounds focusing on the environment Covers many aspects critical to assessing and managing environmental pollution including characterization, risk assessment, regulation, transport and fate, and remediation or restoration New topics to this edition include Ecosystems and Ecosystem Services, Pollution in the Global System, Human Health Impacts, the interrelation between Soil and Human Health, Environmental Justice and Community Engagement, and

Computer Modeling Applications for Environmental Engineers in its second edition incorporates changes and introduces new concepts using Visual Basic.NET, a programming language chosen for its ease of comprehensive usage. This book offers a complete understanding of the basic principles of environmental engineering and integrates new sections that address Noise Pollution and Abatement and municipal solid-waste problem solving, financing of waste facilities, and the engineering of treatment methods that address sanitary landfill, biochemical processes, and combustion and energy recovery. Its practical approach serves to aid in the teaching of environmental engineering unit operations and processes design and demonstrates effective problem-solving practices that facilitate self-teaching. A vital reference for students and professional sanitary and environmental engineers this work also serves as a stand-alone problem-solving text with well-defined, real-work examples and explanations.

publication of the SBPD Publishing House, Agra. Environmental science has become the most popular subject in the world nowadays. The whole world is facing the threat of imbalance in the environment such as overexploitation of nature and natural resources, deforestation, industrialisation and urbanisation. Our ancient scriptures and literature are the witness of awareness and conservation instinct about the environment at that time. The subject environmental studies has become the part of syllabus of the Degree courses after the issuing of an order by the Hon'ble Supreme Court to create awareness among the students. This book has been written according to the unified syllabus issued by U.G.C. for all universities and colleges in India. The authors' are very satisfied to say that the book contains all the latest information and data, which will be useful for the young generation. The authors' are proud to incorporate some more chapters viz. Chapter 2–The Vedic Description and Religious Aspect of Environment, Chapter 3–Current Status of Environment in India and Chapter 10-A Threat to 21st Century AIDS. Attention has also been drawn to provide more and more questions, objective type questions etc. to the students for their examination point of view.
