Having mastered the basic vocabulary and elementary grammar, a student generally learns to use a language that he wants to achieve mainly by practice in the sentence patterns, which are the living substance of the language. There are basic sentence patterns and special sentence patterns in Chinese. Most of the special sentence patterns involve word group patterns, adjective patterns, noun patterns, preposition patterns, etc. However, in English most sentence patterns are verb patterns. A large part of Chinese special sentence patterns are related to the predicate of the sentence, in which nouns, adjectives, word groups, etc play a part. Word groups are important elements forming the predicate of the sentence. Nouns and adjectives alone can also function as the predicate of the sentence. However, phrases (similar to Chinese word groups) as well as nouns and adjectives alone cannot function as the predicate of the sentence in English. In this book, six Chinese basic sentence patterns and twelve Chinese special sentence patterns are introduced, which cover all the most important and most commonly-used Chinese sentence patterns. This book will minutely illustrate them one by one with charts. They are classified in accordance with their functions in the sentence in a systematical way, along with necessary comparison with English sentence patterns and translation. When you have got a good command of the structures and usage of the Chinese sentence patterns introduced in this book, you are able to write or to speak standard Chinese more readily and fluently.

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can

help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

The definitive translation by Dick Davis of the great national epic of Iran—now newly revised and expanded to be the most complete English-language edition A Penguin Classic Dick Davis—"our pre-eminent translator from the Persian" (The Washington Post)—has revised and expanded his acclaimed translation of Ferdowsi's masterpiece, adding more than 100 pages of newly translated text. Davis's elegant combination of prose and verse allows the poetry of the Shahnameh to sing its own tales directly, interspersed sparingly with clearly marked explanations to ease along modern readers. Originally composed for the Samanid princes of Khorasan in the tenth century, the Shahnameh is among the greatest works of world literature. This prodigious narrative tells the story of pre-Islamic Persia, from the mythical creation of the world and the dawn of Persian civilization through the seventh-century Arab conquest. The stories of the Shahnameh are deeply embedded in Persian culture and beyond, as attested by their appearance in such works as The Kite Runner and the love poems of Rumi and Hafez. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

This textbook presents a selection of thirteen expository essays written from the 1920s through the 1980s by influential Chinese intellectuals on controversial issues of their times, including the emancipation of women, the reforms of the Chinese language, the implementation of modernization, and freedom and patriotism. To provoke classroom discussion, each topic is treated by essayists with opposing views. Prepared for American students who have already completed two years of Chinese and who are interested in reading original documents, the book juxtaposes traditional and simplified characters for the text and vocabulary so that students can be exposed to both versions of Chinese characters. Each of the thirteen texts is followed by a detailed glossary, annotated in English, with suggested topics for class discussion. An index at the end of the book allows students easy access to the vocabulary items. Audio and video materials are available for use with this text.
