By 2050, humanity could devour an estimated 140 billion tons of minerals, ores, fossil fuels and biomass per year three times its current appetite unless the economic growth rate is decoupled from the rate of natural resource consumption. Developed countries citizens consume an average of 16 tons of those four key resources per capita (ranging up to 40 or more tons per person in some developed countries). By comparison, the average person in India today consumes four tons per year. With the growth of both population and prosperity, especially in developing countries, the prospect of much higher resource consumption levels is far beyond what is likely sustainable if realised at all given finite world resources, warns this report by UNEP's International Resource Panel. Already the world is running out of cheap and high quality sources of some essential materials such as oil, copper and gold, the supplies of which, in turn, require ever-rising volumes of fossil fuels and freshwater to produce. Improving the rate of resource productivity (doing more with less) faster than the economic growth rate is the notion behind decoupling, the panel says. That goal, however, demands an urgent rethink of the links between resource use and economic prosperity, buttressed by a massive investment in technological, financial and social innovation, to at least freeze per capita consumption in wealthy countries and help

developing nations follow a more sustainable path.

of many other people just like her and she becomes immersed in this world: the drugs, the late nights, the glamour, being an outcast, the attention and validation from men. Mostly she thrives on how taboo her life has become. Following significant personal tragedy and trauma, the line between Rita's sex worker persona Gia and her real self begins to blur in a seemingly endless loop of grief, work, sex, love and heartbreak. In this achingly honest memoir, Rita learns that death and trauma do not always bring grand transformative experiences. Sometimes, in order to go forward, we have to write our own stories and choose to keep living. Unflinching, compelling and darkly funny, *Come* announces a fearless new talent in Australian writing. It's just before New Year, and Frank, an overweight American tourist, has hired Kenji to take him on a guided tour of Tokyo's nightlife. Depicted as an insular and forbidding police state with an “insane” dictator at its helm, North Korea—charter member of Bush’s “Axis of Evil”—is a country the U.S. loves to hate. Now the CIA says it possesses nuclear, chemical, and biological weapons, as well as long-range missiles capable of delivering them to America’s West Coast. But, as Bruce Cumings demonstrates in this provocative, lively read, the story of the U.S.-Korea conflict is more complex than our leaders or our news media would have us believe. Drawing on his extensive knowledge of Korea, and on declassified government reports, Cumings traces that story, from the

brutal Korean War to the present crisis. Harboring no illusions regarding the totalitarian Kim Jong Il regime, Cumings nonetheless insists on a more nuanced approach. The result is both a counter-narrative to the official U.S. and North Korean versions and a fascinating portrayal of North Korea, a country that suffers through foreign invasions, natural disasters, and its own internal contradictions, yet somehow continues to survive.

'I'm in story heaven with this book.' Cecelia Ahern, author of *P.S. I Love You* Sentaro has failed. He has a criminal record, drinks too much, and his dream of becoming a writer is just a distant memory. With only the blossoming of the cherry trees to mark the passing of time, he spends his days in a tiny confectionery shop selling dorayaki, a type of pancake filled with sweet bean paste. But everything is about to change. Into his life comes Tokue, an elderly woman with disfigured hands and a troubled past. Tokue makes the best sweet bean paste Sentaro has ever tasted. She begins to teach him her craft, but as their friendship flourishes, social pressures become impossible to escape and Tokue's dark secret is revealed, with devastating consequences. *Sweet Bean Paste* is a moving novel about the burden of the past and the redemptive power of friendship. Translated into English for the first time, Durian Sukegawa's beautiful prose is capturing hearts all over the world.

We do not know if the Buddha could read or write. He left nothing other than the oral stories of his life, his inspiration and his teachings, passed from generation to generation. Later, his words and the incidents of his life were preserved for us on fragile palm leaves. These stories are as fresh and relevant today as they were when told under the cool moonlight of India 2,500 years ago. This collection of timeless, well-loved stories from the life of the Buddha is presented with simple elegance by Saddhaloka.

This unique textbook explores practice-based research (PBR), using numerous practice examples

to actively encourage and engage students and practitioners to embrace research as a meaningful support for their practice. Whilst evidence-based practice gives practitioners access to information about "universal" best practices, it does not prioritize practitioner-generated knowledge or promote new research-based interventions relevant to their own practice circumstances as PBR does. This book discusses the evolution of PBR as a distinct social work research approach, describes its principles and methods and presents a range of exemplars illustrating the application of PBR within different practice methods in different practice settings. The chapters cover: Identifying the research question in a PBR model Designing a study and identifying a methodology Sampling Literature reviews Gathering data Ethics Analyzing data and interpreting results Putting research into practice Viewing the practitioner as central to the research process, and research as a necessary component of practice, this invaluable book emphasizes the seamless integration of practice and research. It is about research in social work practice rather than research on social work practice. Each chapter includes an overview, an introduction, and a key concepts summary. Practice-Based Research in Social Work is a very accessible text suitable for social work students, particularly MSW students, and practitioners.

“Golway’s revisionist take is a useful reminder of the unmatched ingenuity of American politics.”—Wall Street Journal History casts Tammany Hall as shorthand for the worst of urban politics: graft and patronage personified by notoriously crooked characters. In his groundbreaking work *Machine Made*, journalist and historian Terry Golway dismantles these stereotypes, focusing on the many benefits of machine politics for marginalized immigrants. As thousands sought refuge from Ireland’s potato famine, the very question of who would be included under the protection of American democracy was at stake. Tammany’s transactional politics were at the heart of crucial social reforms—such as child labor laws, workers’ compensation, and minimum wages— and Golway demonstrates that American political history cannot be understood without Tammany’s profound contribution. Culminating in FDR’s New Deal, *Machine Made* reveals how Tammany Hall “changed the role of government—for the better to millions of disenfranchised recent American arrivals” (New York Observer).

Latin America's experiments in direct democracy Since 2011,

a wave of popular uprisings has swept the globe, taking shape in the Occupy movement, the Arab Spring, 15M in Spain, and the anti-austerity protests in Greece. The demands have been varied, but have expressed a consistent commitment to the ideals of radical democracy. Similar experiments began appearing across Latin America twenty-five years ago, just as the left fell into decline in Europe. In Venezuela, poor barrio residents arose in a mass rebellion against neoliberalism, ushering in a government that institutionalized the communes already forming organically. In *Building the Commune*, George Ciccariello-Maher travels through these radical experiments, speaking to a broad range of community members, workers, students and government officials. Assessing the projects' successes and failures, *Building the Commune* provides lessons and inspiration for the radical movements of today.

Steve Neale and Frank Krutnik take as their starting point the

remarkable diversity of comedy's forms and modes - feature-length narratives, sketches and shorts, sit-com and variety, slapstick and romance. Relating this diversity to the variety of comedy's basic conventions - from happy endings to the presence of gags and the involvement of humour and laughter - they seek both to explain the nature of these forms and conventions and to relate them to their institutional contexts. They propose that all forms and modes of the comic involve deviations from aesthetic and cultural conventions and norms, and, to demonstrate this, they discuss a wide range of programmes and films, from *Blackadder* to *Bringing up Baby*, from *City Limits* to *Blind Date*, from the *Roadrunner* cartoons to *Bless this House* and *The Two Ronnies*.

Comedies looked at in particular detail include: the classic slapstick films of Keaton, Lloyd, and Chaplin; Hollywood's 'screwball' comedies of the 1930s and 1940s; Monty Python, Hancock, and Steptoe and Son. The authors also relate their discussion to radio comedy.

This report explores technological possibilities and opportunities for developing and developed countries to accelerate decoupling and reap environmental and economic benefits of increased resource productivity. It examines policy options successful in helping different countries improve resource productivity in various sectors of their economy, avoiding negative impacts on the environment. It does not seem possible for a global economy based on the current unsustainable patterns of resource use to continue into the future. Economic consequences of these patterns are already apparent in increases in resource prices, increased price volatility and disruption of environmental systems. The environment impacts are also leading to potentially irreversible changes to the world's ecosystems, often with direct effects on people and the economy - for example: damage to health, water shortages, loss of fish stocks or

increased storm damage. This report shows that much of the policy design 'know-how' needed to achieve decoupling is present in terms of legislation, incentive systems, and institutional reform. Many countries have tried these out with tangible results, encouraging others to study and where appropriate replicate and scale up such practices and successes
