What fuels capitalism and what stops it from collapsing? Does marketing communications support and sustain the economic and political status quo? This book is not about describing the ways in which businesses can optimize the messages they put across or about adding to the marketing communicator's toolkit. This book argues that marketing communications plays an increasingly important role in bolstering contemporary capitalism. Drawing on conceptualizations of the 'market' from political economy and sociology, it focusses on five logics that underpin and sustain the form of capitalism in which we live: the logic of competition, the logic of sustainability, the logic of individualism, the logic of objectivity, and the logic of distraction. It does this by exploring those arenas which are increasingly dominated by the communicative

activities of business: sport, CSR, social media, statistics, and entertainment. Bringing theories from marketing and consumer research, sociology, cultural studies, technology and media studies to bear on marketing communications, this book is necessary reading for undergraduate and postgraduate students and academics who wish to understand the broader role of marketing communications in the reproduction of contemporary capitalism.

This comprehensive book features recent works on leveraged marketing communications (LMC)—an intentional pairing of a brand to benefit from the associations the target audience has with the object. LMC conceptually binds a wide range of marketing communication strategies previously studied in isolation: celebrity endorsements, sponsorship, product placements, cause-related marketing, and cobranding. LMC strategies assume that an entity (e.g., Michael Jordan) can be paired with a brand (e.g., Nike) to evoke associations that ultimately enhance brand awareness and evaluations. The collection of chapters in this book examines the association between brands and entities, ideas, and contexts and combines theory and practice to offer new perspectives to help academics, practitioners, and policymakers better understand and apply LMC research. The chapters collectively provide a theoretical framework for building brand equity via linking brands to people, places, and things; examine how marketers can best leverage brand alliances; explore ways to maximize the effectiveness of sponsorship, product placement, corporate social responsibility (CSR), and cause-related marketing; and summarize our knowledge of the various forms of LMC. The chapters in this book were originally published in the *International Journal of Advertising*.

This book reviews, updates and enhances the basic concepts surrounding the academic theory and practice of Integrated Marketing Communication (IMC). Since the introduction of IMC in the late 1980s, the concept has spread around the world. In that expansion, many authors have written about IMC; practitioners have adopted and adapted the concept to fit their own market situations. Further, dramatic changes have occurred in the technologies used in marketing communications which consumers have accepted and employed in their consumption of marketers' messages and incentives. Thus, there have been dramatic changes in how IMC was initially envisioned and how it has developed over time. This book identifies and discusses these changes, how they have occurred and what they mean going forward for all types of marketers around the world. Thus, IMC, and indeed integration of communications at all organisational levels is an essential in the 21st century organisations. This book was published as a special issue of the Journal of Marketing Communications.
