"AMTE, in the Standards for Preparing Teachers of Mathematics, puts forward a national vision of initial preparation for all Pre-K-12 teachers who teach mathematics. SPTM pertains not only to middle and high school mathematics teachers who may teach mathematics exclusively but also to elementary school teachers teaching all disciplines, special education teachers, teachers of emergent multilingual students, and all other teaching professionals and administrators who have responsibility for students' mathematical learning. SPTM has broad implications for teacher preparation programs, in which stakeholders include faculty and administrators in both education and mathematics at the university level; teachers, principals, and district leaders in the schools with which preparation programs partner; and the communities in which preparation programs and their school partners are situated. SPTM is intended as a national guide that articulates a vision for mathematics teacher preparation and supports the continuous improvement of teacher preparation programs. Such continuous improvement includes changes to preparation program courses and structures, partnerships involving schools and universities and their leaders, the ongoing accreditation of such programs regionally and nationally, and the shaping of state and national mathematics teacher preparation policy. SPTM is

also designed to inform accreditation processes for mathematics teacher preparation programs, to influence policies related to preparation of teachers of mathematics, and to promote national dialogue around preparing teachers of mathematics. The vision articulated in SPTM is aspirational in that it describes a set of high expectations for developing a well-prepared beginning mathematics teacher who can support meaningful student learning. The vision is research-based and establishes a set of goals for the continued development and refinement of a mathematics teacher preparation program and a research agenda for the study of the effects of such a program. SPTM contains detailed depictions of what a well-prepared beginning teacher knows and is able to do related to content, pedagogy, and disposition, and what a strong preparation program entails with respect to learning experiences, assessments, and partnerships. Stakeholders in mathematics teacher preparation will find messages related to their roles. Standards for Preparing Teachers of Mathematics includes standards and indicators for teacher candidates and for the design of teacher preparation programs. SPTM outlines assessment practices related to overall quality, program effectiveness, and candidate performance. SPTM describes specific focal practices by grade band and provides guidance to stakeholders regarding processes for productive change"--

Praxis Core tests measure skills in reading, writing and mathematics. The third edition of Clinical Care of the Diabetic Foot has been fully revised and updated, and it will continue to be the essential handbook on foot care and the treatment of the diabetic foot. The diabetic foot is typically the victim of nerve damage, micro- and macrovascular disease and faulty healing, mechanisms that without proper care can lead to amputation. More than 80,000 diabetes-related amputations are performed in the United States each year, but non-specialist primary care providers, as well as residents, nurses, and diabetes educators, can help prevent this devastating, life-altering, and expensive complication. Healthcare professionals and medical students alike will find that this concise, well-indexed, and updated guide offers practical advice on detecting and managing diabetes-related foot complications.

Do you want your school or district to truly become a learning organization? How do you foster lasting and meaningful change? How do you avoid rejection of your new approach to teaching and learning? If you've been involved in a school change effort, you most likely have struggled with these questions. To ease this struggle, Douglas B. Reeves has proposed a new framework to promote effective change efforts through teacher leadership. In this book, you will explore not only cutting-edge research findings, but also practical applications that can help improve student achievement and educational equity. You can learn how to achieve lasting results as an educator and school leader. You can learn from other teacher researchers how to infuse your classroom, school, or district with enthusiasm, meaningful teaching, improved results, and greater satisfaction. Even as you strive for innovation, you naturally want to avoid having the next new thing become the latest old thing. To achieve lasting change, educators must embrace evidence-based decision making rather than the fact-free debate. Reeves has found that educators more readily accept decisions they disagree with if they believe the decision-making process was fair--not based on opinion or hierarchy. Reeves aims for you to help him build a network of teacher leaders based on this new evidence-based framework that will foster resilient learning organizations. Come along--explore, act, and share. Note: This product listing is for the Adobe Acrobat (PDF) version of the book.

For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a

strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right? Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In addition, Brookhart addresses * Common misconceptions about rubrics; * Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and * How to use rubrics for formative assessment and grading, including standards-based grading and report card grades. Intended for educators who are already familiar with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

This guidebook is designed to help educators and others in their efforts to work with students with emotional and behavioral difficulties (EBD). Chapter 1 provides an overview of the needs and problems presented by such students. Chapter 2 contains basic information to help provide an enhanced understanding of students with EBD. Causes of emotional and behavioral problems, the educators role in identifying and referring students, documenting behaviors, cultural differences, drug therapy, and getting support from others are discussed. Chapter 3 contains strategies for structuring curriculum and instruction so that they have the most positive impact possible on student performance. The following chapter offers tips and ideas for strengthening classroom management practices. It also describes techniques to help educators interact with students in a manner that creates a positive and supportive classroom environment. Because of the success of instructional and classroom management programs can be enhanced by colleagues, families, and others, chapter 5 describes promising practices that many schools and districts now use to support classroom teachers and other instructional staff. The final chapter lists supplementary sources and contact information for relevant organizations. Appendices include federal regulations on the discipline of students with EBD and a glossary. (CR)
