A twisted relationship between two couples reaches a terrible climax in this novel by the New York Times-bestselling author of *Machines Like Me*. Colin and Mary are lovers on holiday in Italy, their relationship becoming increasingly problematic as they become increasingly alienated from one and other. They move from place to place in this foreign land but seemingly without aim or purpose, seemingly bored and without attachment. Then they meet a man named Robert and his disabled wife, Caroline. Colin and Mary seem happy for the diversion—happy to meet another couple that takes their focus off of each other for a while. But things become strange when they attempt to leave: Robert and Caroline insist that they stay with them for a while longer. While Mary and Colin do rediscover an erotic attraction to each other during this time, they also find that their relationship with Robert and Caroline is taking a dreadful and horrific turn, in this “fine novel” by the Booker Prize-winning author of *Saturday* and *On Chesil Beach* (New Statesman). “McEwan perfectly captures the thrill of travel when one is divorced from familiar surroundings and the chance of something unusual and out-of-character seems possible. Of course, this being a McEwan fiction, the possibility is a brutal truth about how people find love in extreme ways.”—The Daily Beast

A Humancentric Approach to a Technological Innovation THIS IS NOT SIMPLY A BOOK ABOUT TECHNOLOGY. IT IS A BOOK ABOUT THE INCREASING ROLE HUMANITY MUST PLAY DURING THIS TECHNOLOGICAL REVOLUTION IN ORDER TO THRIVE, NOT JUST

SURVIVE. ? In *The transHuman Code*, authors Carlos Moreira and David Fergusson ask, "Are we building a better future for humanity with the help of magnificent technology or could we instead be building a future with better technology at the expense of humanity?" In proclaiming the obvious, that the human is and will always be the greatest and most advanced technology the world has ever known, the authors ask, "Doesn't it then make the most sense to place the understanding, improvement, and utilization of humanity as today's highest priority?" *The transHuman Code* is a book of conversations about how we employ the power of technology to script the best future possible. By introducing you to some of the world's most important innovators and dynamic developments occurring today, giving you a clearer understanding of their implications and then sparking the conversations that need to happen as a result, the hope is that together we will develop a transHuman code that will allow us to remain both the apex and axis of all technological progress from here forward. How we do this today is new territory. Dynamic innovative opportunities are here, or very near, for the taking. Which ones should we pursue and why? *The transHuman Code* introduces, through an address of the core elements of our life ecosystem, the discussions we must have. Together, both readers and contributors will form collective, proactive answers in this interactive process. You are invited to join Moreira and Fergusson, through this groundbreaking book, to begin this important work together.

Our planet is growing hotter, which is mainly due to the burning of fossil fuels. Yet, most of us remain chained to the belief that there is no alternative source of energy sufficiently plentiful and cheap. *Dawn of the Solar Age* provides a blueprint for shifting the energy base of human civilisation out of fossil fuels and successfully reducing the concentration of greenhouse gases in the atmosphere. The author shows how the commercialisation of fully proven technologies—that can provide limitless amounts of renewable energy and entirely replace all fossil fuels—is being delayed to serve the purposes of dominant corporations and nations. He studies the economic viability of these technologies and tells us how we can avert the imminent disaster that we face today. He concludes that the transition out of fossil fuels, though difficult, need not be too slow to prevent irreparable damage.

Ormai non ci sono più scuse: bisogna eliminare la plastica. Animali che muoiono soffocati. un'isola di plastica, grande 3 volte la Francia, che galleggia nel pacifico... Non se ne può più. questo libro spiega come ognuno di noi può correre ai ripari. una mappa dettagliata della situazione e una rassegna completa di tutte le alternative disponibili alla plastica. Bisogna infatti correre ai ripari: • Liberando le nostre abitazioni dalla plastica, in cucina, in bagno e in giardino. • Usando materiali alternativi (vetro, ceramica, bambù, canapa...). • Abbracciando un'economia locale sostenibile. • Diffondendo «il verbo» in famiglia, con gli amici, sul lavoro. Una MAPPA DETTAGLIATA DELLA SITUAZIONE e una RASSEGNA COMPLETA di tutte le alternative disponibili alla plastica. Finalmente anche in Italia, il libro che in America ha scatenato il dibattito sulla «virtuosità» della raccolta differenziata: riciclare è insufficiente,

bisogna eliminare. «Nell'ultimo mezzo secolo la produzione mondiale di plastica è aumentata da 5,5 milioni a circa 100 milioni di tonnellate. Ogni anno nel pianeta vengono utilizzati ben 500 miliardi di buste derivate dal petrolio; 8 milioni di tonnellate finiscono negli oceani. Ogni minuto si acquistano 1 milione di bottiglie di plastica, ovvero il 10% di tutti i rifiuti a livello globale.

Questo libro ci lascia assolutamente senza alibi». - MASSIMILIANO PONTILLO

In un tempo in cui la maggior parte dell'umanità si è allontanata da una vita a contatto con la natura, dirigendosi verso una eccessiva medicalizzazione anche dei più piccoli disturbi fisici, l'autrice – in contatto con i più famosi monasteri e conventi d'Italia – ha scelto di farsi raccontare la sapienza erboristica e medica che monaci e frati hanno coltivato fin dai tempi più remoti. In un viaggio entusiasmante Anna Maria Foli ha incontrato abati e madri badesse, priori e superiori, attingendo ai codici medievali della tradizione sul cosiddetto "giardino monastico" e ai ricettari della farmacia di San Salvatore a Gerusalemme, scoprendo che l'interesse per la psicosomatica e la terapia olistica fiorì proprio negli antichi conventi. Un grande prontuario di ricette terapeutiche, tutte naturali, attinte dall'antica sapienza di monasteri e conventi. Una guida pratica al riconoscimento delle erbe officinali e al loro uso medicinale, cosmetico, aromatico, dietetico. Di ogni rimedio, la storia, gli aneddoti, le caratteristiche, le proprietà curative, la preparazione e le modalità di utilizzo.

Starting in the mid-1800s, there was a steady drop in deaths from all infectious diseases, decreasing to relatively minor levels by the early 1900s. The history of that transformation involves famine, poverty, filth, lost cures, eugenicist doctrine, individual freedoms versus state might, protests and arrests over vaccine refusal, and much more. But the authors shows that vaccines, antibiotics, and other medical interventions are not responsible for the increase in lifespan and the decline in mortality from infectious diseases.

Proposes illnesses and maladies are the result of improper diet and presents a macrobiotic diet, heavily dependent on whole grains and whole foods, that will speed healing by maintaining a balance of the universal forces, yin and yang.

The Egyptian civilization, which flourished along the banks of the Nile for about 3000 years, was one of the most extraordinary and enduring of the ancient world. Even today, after two thousand years since its setting, it continues to exert considerable charm. The Egyptians left many traces of their culture, thanks to the climate dry desert that has preserved over the centuries. The Sphinx and many pyramids, mummies, funerary masks, funerary decorations, the papyri, have thus been preserved from destruction, the common fate of many ancient remains.

Egypt is in fact also known as the "gift of the Nile", because the flooding of the river deposited on the fields a layer of fertile silt, vital for the growth of crops.

Already in prehistoric times, the first settlers learned to sow and plant their crops in the fields still covered by mud after the waters had receded. I collected, almost always abundant, they allowed that civilization to thrive and achieve a brilliance never known before. The ancient Egyptians called the fertile valley of the Nile kemet, "black earth", and themselves remet-en-kemet, "the people of the black earth", while the desert surrounding the town was said deshret, "red earth."

A successful Italian doctor's idyllic life is shattered by shameful accusations in a novel by the Campiello Prize-winning author of *The Worst Intentions*. In a sprawling villa on the outskirts of Rome, the internationally revered pediatric oncologist Leo Pontecorvo and his family have gathered for dinner. For these exemplary members of Italy's upper middle-class, the scene is perfect in every way—until a horrifying accusation airs on the evening news concerning Leo Pontecorvo himself. From this point on, nothing will ever be the same. An allegation of embezzling would be bad enough, but to the horror of his family, Leo is also said to have seduced his son's twelve-year-old girlfriend. The spotlight now turned on Leo reveals every mistake, regret, and contradiction of his lifetime. The details of his private and professional life are debated by both friends and foes, ravenous reporters and punctilious prosecutors. Unable to face the suspicious gazes of his wife and children, Leo descends into the basement of his palatial home—a self-imposed exile in which he attempts to piece together the shattered remains of his life.

Anyone with any kind of digital presence is a publisher. That includes web sites, but also businesses that blog, are present on social media sites such as Facebook, YouTube or Twitter, and even companies that publish and disseminate content digitally, such as white papers, e-books, podcasts, etc. The reason for this shift is clear: it's easier and cheaper than ever to have a digital

presence - and to use your digital profile to market to your customers and prospects. Doing so reduces, and in some cases, eliminates, the need for advertising. Why buy media when you ARE the media? But as we all know, with great power comes great responsibility. What kind of content should you publish? In what forms, and on what platforms? How do you ensure that you'll keep having things to say, and how will you say them effectively, in a consistent "voice" unique to your organization? How will you know if your content strategy is working?
