In this unique collection of essays, some of today's smartest Jewish thinkers explore a broad range of fundamental questions in an effort to balance ancient tradition and modern sexuality. In the last few decades a number of factors—post-modernism, feminism, queer liberation, and more—have brought discussion of sexuality to the fore, and with it a whole new set of questions that challenge time-honored traditions and ways of thinking. For Jews of all backgrounds, this has often led to an unhappy standoff between tradition and sexual empowerment. Yet as The Passionate Torah illustrates, it is of critical importance to see beyond this apparent conflict if Jews are to embrace both their religious beliefs and their sexuality. With incisive essays from contemporary rabbis, scholars, thinkers, and writers, this collection not only surveys the challenges that sexuality poses to Jewish belief, but also offers fresh new perspectives and insights on the changing place of sexuality within Jewish theology—and Jewish lives. Covering topics such as monogamy, inter-faith relationships, reproductive technology, homosexuality, and a host of other hot-button issues, these writings consider how contemporary Jews can engage themselves, their loved ones, and their tradition in a way that's both sexy and sanctified. Seeking to deepen the Jewish conversation about sexuality, The Passionate Torah brings together brilliant thinkers in an attempt to bridge the gap between the sacred and the sexual. By far the biggest change to The UK Pesticide Guide in 2020 is the loss of a number of active ingredients that have been fundamental to many crop protection programmes. The final use-up of chlorothalonil formulations; propiconazole, fenpropimorph, chloridazon and diquat occurs in 2020 but there are also a few exciting new additions. Aclonifen is a new residual herbicide for use in potatoes that already has a number of EAMUs for use in minor crops. BASF is launching its new triazole, mefentrifluconazole, which promises to restore full triazole activity, at least initially. On the insecticide front the new active ingredient from Corteva agriscience, sulfoxaflor, is now listed for use in Cucurbitae and ornamentals under full protection for control of aphids and whitefly.
