theology is impoverished and we are so quick to adopt new models that we have forgotten our own past. David Hoyle explores the changing theologies of ministry during the church's history with the aim of challenging the lack of theological reflection in some of today's results-driven understanding of ministry that seems more influenced by the business world than by Christian theology and tradition. Setting out to explain why theologians said what they said about ministry, why it might matter, and why it might be exciting, Hoyle covers nearly two thousand years of theological reflection from the Didache to Michael Ramsey and current writers, and provides a synthesis not found anywhere else. The book offers realistic sustenance to practitioners struggling with the new demands on clergy. The guidelines on child-friendly justice, and their explanatory memorandum, were adopted by the Council of Europe in 2010. Based on existing international and European standards, in particular the United Nations Convention on the Rights of the Child and the European Convention on Human Rights, the guidelines are designed to guarantee children's effective access to and adequate treatment in justice. They apply to all the circumstances in which children are likely, on any ground and in any capacity, to be in contact with the criminal, civil or administrative justice system. They recall and promote the principles of the best interests of the child, care and respect, participation, equal treatment and the rule of law. The guidelines address issues such as information, representation and participation rights, protection of privacy, safety, a multidisciplinary approach and training, safeguards at all stages of proceedings and deprivation of liberty. The 47 Council of Europe member states are encouraged to adapt their legal systems to the specific needs of children, bridging the gap between internationally agreed principles and reality. To that end, the explanatory memorandum offers examples of

good practices and proposes solutions to address and remedy legal and practical gaps in justice for children. These guidelines form an integral part of the Council of Europe's strategy on children's rights and its programme "Building a Europe for and with children". A series of promotion, co-operation and monitoring activities are planned in member states in view of ensuring effective implementation of the guidelines for the benefit of all children.

This new edition of the Guidelines for the Professional Conduct of the Clergy is a revised and extended version of the first edition, which was published in 2003 by the Convocations of the Clergy. It is not a formal code of conduct, but a reflection by the Convocations on the words of the Ordinal, addressed to the clergy at the time of their ordination to the ministry of the Church. It draws on the wide experience of the clergy who belong to the General Synod, with contributions from the House of Bishops and the House of Laity. The Guidelines are offered as a means of sharing the fruits of accrued wisdom and experience with colleagues, especially those beginning a new life as ordained ministers, and with all engaged in the mission and ministry of the Church. This new edition takes account of significant developments since 2003, including the publication of a new Ordinal, the new Clergy Discipline Measure, new terms of service for the clergy via Common Tenure, and most recently the comprehensive work which is being undertaken throughout the Church with regard to Safeguarding.

‘Faithful relationships are fundamental to maintaining and improving the life of the Church. It is my fervent desire that increasing trust, particularly that which flows from trustworthy clergy, will transform God’s world.’

Justin Welby, Archbishop of Canterbury, from the Foreword

Forming Ministers or Training Leaders is a unique book because it is based on a significant piece of empirical research. Anthony Clarke explores the way that the practice among theological colleges in the UK has been changing and develops the concept of the “pastoral imagination” to express what a theological college is aiming to do with its students. The book then offers an analysis of the “pastoral imagination” that is in fact at work in a selection of Baptist colleges and other theological institutions in the UK. Alongside this Clarke offers a coherent and robust theological account of the work of a theological college, through engaging with recent trinitarian theology, and argues that this is best understood as a process of formation which embraces other ideas of training and education.
