Dr. Ian K. Smith's Shred is the answer to every dieter's biggest dilemmas: how to lose that last twenty pounds? How to push through that frustrating plateau? What to do when nothing else is working? Here, Smith has created a weight loss program that uses all he knows about strategic dieting in one plan--like putting all the best players on the field at once to create a can't lose combination. Shred combines a low GI diet, meal spacing, and meal replacements. Those who follow Shred will constantly be eating (every three and a half hours!), four meals or meal replacements (soups, smoothies, shakes) and 3 snacks a day, over a six week program. Shred also introduces Dr. Ian's concept of "Diet Confusion". Diet Confusion, like muscle confusion, tricks the body and revs up its performance. In the same way you need to vary your workout to see results, switch up your food intake to boost your metabolism. No matter how often or how unsuccessfully you've dieted before, Shred: The Revolutionary Diet will change your life. Shred has taken the internet by storm, and thousands have already joined Dr. Ian's Shredder Nation, losing an average of four inches, two sizes or twenty pounds in six weeks. In a study funded by the Susan G. Komen for the Cure® Foundation, Dr. Mary Flynn researched the effects of an olive-oil-and-plant-based diet on overweight women who had previously undergone treatment for invasive breast cancer. Now, she reveals her findings in The Pink Ribbon Diet. Not only is this program more effective than the National Cancer Institute's recommended low-fat diet, but it is also a diet that women find more satisfying and can thereby sustain for life. The Pink Ribbon Diet features 150 recipes that naturally emphasize Mediterranean foods with nutrients thought to lower breast-cancer risk and foods that improve biomarkers, indicators of risk. This diet has been effective in helping women who have had breast cancer and those at risk of getting it to avoid unhealthy weight gain and safeguard their health.

Explains what your body is "thinking" and tells you why your genes actually want you to be fat, and that by deactivating these "killer genes," you can reprogram your body for the health, life, looks, and longevity you desire. Reprint.

Discover the original international diet sensation—used by Adele, heavyweight champion David Haye, and Pippa Middleton—that will help you lose seven pounds in seven days while experiencing lasting energy and eating all the foods you love. Over the past few years, fasting has become a popular diet option. Studies show that fasting—whether through moderate calorie restriction every day or the more severe but less frequent intermittent fasting—can help people lose about thirteen to fourteen pounds in six months and reduce their risk of developing disease. When we fast, our body's energy stores activate what is known as sirtuins, or the "skinny gene," and many positive changes ensue. Fat storage is switched off, and our body stops its normal growth processes and goes into "survival" mode. Fat burning is stimulated and the genes involved in the repair and rejuvenation of our cells are turned on—which all results to weight loss and improved resistance to disease. But if not done correctly, fasting can lead to hunger, irritability, fatigue, and loss of muscle. Enter Sirtfoods: a newly discovered group of foods that is revolutionizing healthy eating. Ranging from chocolate and red wine to garlic and walnuts, sirtfoods are particularly rich in special nutrients that help us activate the same skinny genes in our bodies that fasting triggers. Nutritionists Aidan Goggins and Glen Matten have created The Sirtfood Diet to help you effectively lose weight and improve your resistance to disease, while still giving you incredible energy and glowing health.

NEW YORK TIMES BESTSELLER Zero Belly Diet is the revolutionary new plan to turn off your fat genes and help keep you lean for life! Nutrition expert David Zinczenko—the New York Times bestselling author of the Abs Diet series, Eat This, Not That! series, and Eat It to Beat It!—has spent his entire career learning about belly fat—where it comes from and what it does to us. And what he knows is this: There is no greater threat to you and your family—to your health, your happiness, even your financial future. Yes, you can: Change your destiny. Overcome your fat genes. And he shows

how these foods help heal your digestive system, keeping those gene switches turned off and setting you up for a lifetime of leanness. Other diets can help you lose weight, but only the Zero Belly diet attacks fat on a genetic level, placing a bull's-eye on the fat cells that matter most: visceral fat, the type of fat ensconced in your belly. These fat cells act like an invading army, increasing inflammation and putting you at risk for diabetes, Alzheimer's, arthritis, heart disease, and cancer. Visceral fat can also alter your hormone levels, erode muscle tissue, increase your chances of depression, and destroy your sex drive. But you can turn the odds in your favor. Zero Belly Diet shows you how to deactivate your fat genes, rev up your metabolism, banish bloat, and balance your digestive health, allowing you to easily build lean, strong stomach muscle and strip away unwanted belly fat without sacrificing calories or spending hours at the gym. The result: weight loss that is easier, faster, more lasting, and more delicious than you'd ever imagine.
