Gill Blanchard's practical step-by-step guide to writing a family history is designed for anyone who wants to bring their ancestors' stories to life. She looks at ways of overcoming the particular problems family historians face when writing a family history -- how to deal with gaps in knowledge, how to describe generations of people who did the same jobs or lived in the same area, how to cover the numerous births, marriages and deaths that occur, and when to stop researching and start writing. Her book provides examples to help readers find their own writing style, deal with family stories, missing pieces of information and anomalies. It also offers advice on key aspects of composition, such as adding local and social history context and using secondary material. The focus throughout is on how to develop a story from beginning to end. Exercises are a key feature of the text. There is guidance on the various formats a family history can take and how to choose the appropriate one, with examples of format and layout. Production and publishing are also covered -- books, booklets, newsletters, websites, blogs and ebooks.

Writing History in the Digital Age began as a "what-if" experiment by posing a question: How have Internet technologies influenced how historians think, teach, author, and publish? To illustrate their answer, the contributors agreed to share the stages of their book-in-progress as it was constructed on the public web. To facilitate this innovative volume, editors Jack Dougherty and Kristen Nawrotzki

designed a born-digital, open-access, and open peer review process to capture commentary from appointed experts and general readers. A customized WordPress plug-in allowed audiences to add page- and paragraph-level comments to the manuscript, transforming it into a socially networked text. The initial six-week proposal phase generated over 250 comments, and the subsequent eight-week public review of full drafts drew 942 additional comments from readers across different parts of the globe. The finished product now presents 20 essays from a wide array of notable scholars, each examining (and then breaking apart and reexamining) if and how digital and emergent technologies have changed the historical profession.

In academia, the traditional role of the humanities is being questioned by the "posts"—postmodernism, poststructuralism, and postfeminism—which means that the project of writing history only grows more complex. In *History as a Kind of Writing*, scholar of French literature and culture Philippe Carrard speaks to this complexity by focusing the lens on the current state of French historiography. Carrard's work here is expansive—examining the conventions historians draw on to produce their texts and casting light on views put forward by literary theorists, theorists of history, and historians themselves. Ranging from discussions of lengthy dissertations on 1960s social and economic history to a more contemporary focus on events, actors, memory, and culture, the book digs deep into the how of history. How do historians arrange their data into narratives? What strategies do they employ to justify the validity of their descriptions? Are actors given their own voice? Along the way, Carrard also readdresses questions fundamental to the field, including its necessary membership in the narrative genre, the presumed objectivity of historiographic writing, and the place of history as a science, distinct from the natural and theoretical sciences.

When Linda Spence asked her aging mother to write her life story, her mother stared at a blank sheet of paper and asked—"How? Where do I begin?" In this practical guide to capturing those memories that have been stored away, Linda Spence provides the questions that are the keys to unlocking the memories that make up a life. Beyond the vital statistics are the personal stories that tell what it was like, what we did, and why we did it, how we feel about our choices, and what our circumstances were. Through encouraging coaching, shared memories, and open-ended questions, the process of producing a personal history becomes intriguing and engaging. With *Legacy* the possibilities expand: a personal record is preserved—with its myths, traditions, joys, pains, gains, and losses; a family opens a potential dialogue that will last for

generations; the writer has an opportunity for insight and resolution; the culture of a time and place is noted; the tradition of personal story is revitalized, and our present and future find nourishment and knowledge in the past. Either as a gift that can act as a shared experience as the memories are recounted or as a personal way to take account of one's experiences, often long since forgotten, Legacy is indeed a way to get one's story down.

The New York Times best-selling book exploring the counterproductive reactions white people have when their assumptions about race are challenged, and how these reactions maintain racial inequality. In this "vital, necessary, and beautiful book" (Michael Eric Dyson), antiracist educator Robin DiAngelo deftly illuminates the phenomenon of white fragility and "allows us to understand racism as a practice not restricted to 'bad people' (Claudia Rankine). Referring to the defensive moves that white people make when challenged racially, white fragility is characterized by emotions such as anger, fear, and guilt, and by behaviors including argumentation and silence. These behaviors, in turn, function to reinstate white racial equilibrium and prevent any meaningful cross-racial dialogue. In this in-depth exploration, DiAngelo examines how white fragility develops, how it protects racial inequality, and what we can do to engage more constructively.

Public History: A Textbook of Practice is a guide to the many challenges historians face while teaching, learning, and practicing public history. Historians can play a dynamic and essential role in contributing to public understanding of the past, and those who work in historic preservation, in museums and archives, in government agencies, as consultants, as oral historians, or who manage crowdsourcing projects need very specific skills. This book links theory and practice and provides students and practitioners with the tools to do public history in a wide range of settings. The text engages throughout with key issues such as public participation, digital tools and

media, and the internationalization of public history. Part One focuses on public history sources, and offers an overview of the creation, collection, management, and preservation of public history materials (archives, material culture, oral materials, or digital sources). Chapters cover sites and institutions such as archival repositories and museums, historic buildings and structures, and different practices such as collection management, preservation (archives, objects, sounds, moving images, buildings, sites, and landscape), oral history, and genealogy. Part Two deals with the different ways in which public historians can produce historical narratives through different media (including exhibitions, film, writing, and digital tools). The last part explores the challenges and ethical issues that public historians will encounter when working with different communities and institutions. Either in public history methods courses or as a resource for practicing public historians, this book lays the groundwork for making meaningful connections between historical sources and popular audiences.
