An empirical test of the feasibility of using CA to elicit the preferences of service users of day hospital services is presented. This clearly showed the applicability of CA to the mental health context by demonstrating that users of day hospital services have clear preferences between service attributes.

The above statement remains true today, although it was written almost ten years ago in the Mathematical Sciences Education Board's (MSEB) report Everybody Counts (NRC, 1989). In envisioning a future in which all students will be afforded such opportunities, the MSEB acknowledges the crucial role played by formulae and algorithms, and suggests that algorithmic skills are more flexible

TEA releases two types of test questions for the STAAR test - sample questions and test forms. Sample test questions are small subsets of test questions released from the STAAR test banks. These test questions may have been previously administered to Texas students. A ...

Excellent used with year 7. Stretched the more able. Thank you; Ole Jorgensen Year 6, Beckley Primary ; I loved this activity. I love this site so much I did this at home! Al Green, Wiveliscombe, Somerset. Tried it as a starter for year 9, bottom set.
